Our competitive advantages:

- ① **Ability to propose solutions:** there are so many know-how and experiences in the education and medical industry, so you can propose business and system.
- ② **System analysis and design capabilities:** system configuration analysis, function extraction, external design, logic design, DB design, crud diagram, and detailed design.
- ③ **Development capacity and technology power:** about 20 years, offshore development for Japan and product development experience for China, we can develop system development and anime content.
- ④ **Project management know-how:** progress management by WBS, quality control by a test viewpoint, PL is a level of Japanese certification, and there is no worry about communication.
- ⑤ **Development tools:** you can utilize various development tools to produce high quality and ensure quality.
- ⑥ **Security management:** please ensure that the internal security team will follow strict security rules.
